

Today, your Negotiating Committee passed across its third economic counter proposal to Lockheed Martin.

Although we have made some strides, we are hopeful that the Company will soon recognize, in the form of a comprehensive proposal, that's it's the Machinist Union Members who make this aerospace company second to none in the industry.

The IAM stands behind the Negotiating Committee who have been working hard to represent the members by bringing home an agreement that comes with fair wages, strong benefits and a quality of life for our Brothers, Sisters and their families across the Nation.
